Sub: Application for “Software Engineer (Python)” role at Logpoint Nepal with reference advertisement: XXXX/XX, dated 04-03-2022.

Respected Sir,

With reference to the subject as cited above, I Labin Ojha, would like to apply for a “Software Engineer (Python)” role at Logpoint Nepal. I found the said reference through a job portal site and information provided in the company official website.

I am comfortable working with python and it's Flask framework and SQL databases to build web applications. The team I worked with previously used a custom configured VPS to host their applications, yet I have cursory knowledge of Cloud deployments and some CI/CD as well, with Heroku, Github Actions.

I am a graduate with a BSc. in Computer Science from Tribhuvan University and have previously worked as a full stack software developer with Beta Analytics Pvt. Ltd. on their in-house project.

I am confident I can learn any new technology on the job. I also have a deep interest in emerging technologies and the businesses that they enable. I believe I can provide value to your company and also fuel my personal growth as a developer in this role available at your company.

I would very much like to discuss the aforementioned opportunity at your company. To schedule an interview, please call me at +44 07463 751853. Thank you for taking the time to review my resume. I look forward to talking with you.

Your Sincerely,

Labin Ojha
